

TOA's TS-Series

Portable Conference System

*Lightweight, easy-to-set-up. . .
and affordable!*

*Want to set up your next meeting. . . fast?
Get the conference system that lets you handle
any size meeting simply and easily.*

Reliable

Take it anywhere and set it up in minutes! Truly "a-meeting-in-a-box," TOA's TS-Series Conference System is designed with all the features you'd expect in a system costing thousands more, yet anyone can "plug-n-play" in no time.

CLEAR, CRISP SOUND WITH NO MICROPHONE FEEDBACK.

The TS-Series combines a speaker and microphone in one station and puts this easy-to-use combination right in front of each speaker. No more groping for the mic when you want to

speaking! And you can hear clearly through your own speaker what's said around the table. What's more, there's no annoying and disruptive mic feedback—now your meetings can be effective and productive!

Affordable

WITH THE TS-SERIES, THE CHAIRPERSON IS DEFINITELY IN CONTROL.

With a push-to-talk switch on each station, both delegates and chairperson have a convenient way to be heard. And all stations include an easy-to-see LED at the top of the mic shaft that indicates visually who is speaking. But the chairperson has an additional feature that allows override of all delegates, plus a built-in chime that notifies all that he is resuming control. Multiple chairperson stations can be used, and for further flexibility, the number of delegate stations that are in use simultaneously can be set before the meeting begins.

CHAIRPERSON'S OVERRIDE

Now you can control your meetings easily and quickly with a simple button-push. You instantly have the floor.

SIMPLE, EASY CONTROL

All controls, plus power and signal connections are conveniently located on the TS-700 System Controller.

PROFESSIONAL DETAILS RESULT FROM TOA'S EXTENSIVE EXPERIENCE.

If you're accustomed to the usual garble that results from trying to record a conference, TOA's TS-Series will delight you. Because *each* of the delegate's stations and the chairperson's station is equipped with its own recording output, each person that is speaking comes through on the recording clearly and distinctly. And when delegates forget to turn their mic off, an automatic time-out will do it for them! When it comes to set-up, quick-lock connectors let you put the system together in minutes, while at the same time they keep connections secure in even the most "enthusiastic" of meetings.

Portable

COMPACT AND EASY-TO-STORE, AND TAKES UP LESS TABLE SPACE.

Stow it away in your hotel room or in the trunk of your car. Then carry it into your meeting the next morning to create a professional conference environment.

Expandable

Or set it up as a permanent addition to any conference room. Either way, TOA's TS-Series

will enhance the look and the communications of any meeting. And you avoid the high cost of a built-in system. The TS-Series. It gives you exactly the right combination of state-of-the-art features, portability and cost.

For more information, call your nearest professional audio dealer or contact TOA Electronics at 800-733-7088.

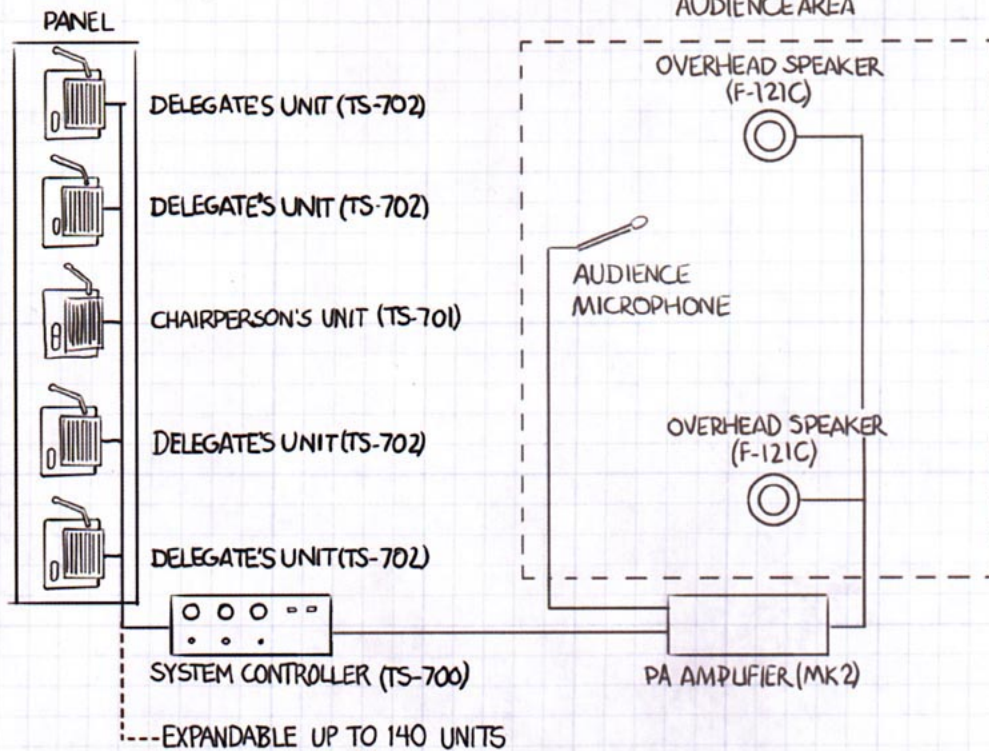

JUST PLUG-N-PLAY!

Quick-lock connectors make set-up simple and quick. Just put the stations in place and plug them in. Perfect for meetings of 4 to 140 people!

MEETING ROOM "A"

SYSTEM
