1. SAFETY PRECAUTIONS

- Before installation or use, be sure to carefully read all the instructions in this section for correct and safe operation.
- Be sure to follow all the precautionary instructions in this section, which contain important warnings and/or cautions regarding safety.
- After reading, keep this manual handy for future reference.

**WARNING**

Indicates a potentially hazardous situation which, if mishandled, could result in death or serious personal injury.

- Install the unit only in a location that can structurally support the weight of the unit and the speaker. Doing otherwise may result in the speaker falling down and causing personal injury and/or property damage.
- (HY-WM1B and HY-WM1W only)

Since the unit is designed for indoor use, do not install it outdoors. If installed outdoors, the aging of parts causes the unit to fail off, resulting in personal injury. Also, when it gets wet with rain, there is a danger of electric shock.
- Owing to the speaker’s size and weight, be sure that at least two persons are available to install the speaker. Failure to do so could result in personal injury.
- Do not use other methods than specified to mount the bracket. Extreme force is applied to the unit and the speaker could fall off, possibly resulting in personal injuries.
- Use nuts and bolts that are appropriate for the wall’s or ceiling’s structure and composition. Failure to do so may cause the speaker to fall, resulting in material damage and possible personal injury.
- Tighten each nut and bolt securely. Ensure that the bracket has no loose joints after installation to prevent accidents that could result in personal injury.
- Use the specified speaker in combination. Doing otherwise may cause the speaker to fail off, resulting in personal injury.
- Do not mount the unit in locations exposed to constant vibration. The mounting bracket can be damaged by excessive vibration, potentially causing the speaker to fall, which could result in personal injury.
- Avoid installing the speaker in locations close to the seashore or in indoor swimming facilities that are not well ventilated. In such locations the bracket may be vulnerable to corrosion, eventually allowing the speaker to fail resulting in personal injury.

2. PRECAUTIONS WHEN INSTALLING THE HY-WM1WP

Only the HY-WM1WP can be installed outdoors.
- Only the HX-5B-WP and HX-5W-WP speakers can be installed outdoors.
- Install the speaker so that all speaker modules face downward from the horizontal axis. Doing otherwise could adversely affect the speaker’s weather resistance and possibly lead to malfunction or failure.

3. INSTALLATION

**Step 1.** Remove the HX-5 series’ rear plate, and attach the unit instead.

**Step 2.** Attach the rear plate (removed in Step 1) to the unit.

**Step 3.** Mount the rear plate to a wall or ceiling.

**Step 4.** Loosen the vertical angle adjustment bolts, fix the speaker in the desired orientation and retighten the angle adjustment bolts.
