The SR-FS4 Floor Stand is designed exclusively for use with a stack of 2 SR-S4L Line Array Speakers. Mounted on casters with lock, it can be easily moved.

Note
To link 2 SR-S4L speakers, an optional SR-EP4 Extension Plate is needed.

1. SAFETY PRECAUTIONS

- Before installation or use, be sure to carefully read all the instructions in this section for correct and safe operation.
- Be sure to follow all the precautionary instructions in this section, which contain important warnings and/or cautions regarding safety.
- After reading, keep this manual handy for future reference.

2. ASSEMBLING THE STAND

Step 1. Attach the side panels to the stand bases. Tighten the fixing bolts loosely, not firmly.

Step 2. Mount the speaker support brackets to the side panels.

Note
- The stand height or speaker elevated height can be adjusted in 5 steps (6 cm per step) by changing the bracket mounting position. Change the bracket position as required.
- The bracket position in the assembly diagram below allows the speakers to be elevated highest above the floor. Normally, mount the brackets at this position.

Step 3. Attach the casters to the stand bases. Tighten all the loose bolts.

Step 4. Remove the 8 screws on both sides of the lower speaker.

Note
- The removed screws are not used.

Step 5. Install the lower speaker first. Put the speaker on the speaker support brackets, then fix it with the supplied 8 hexagon head bolts.

Step 6. Tighten the bolts loosely screwed in Step 1. Confirm in advance that the 4 casters do not rattle on the flat floor.

3. HOW TO LOCK CASTERS

Lock the caster by pressing down the stopper.
