2. INSTALLATION

Step 1. Fix the bracket base on a wall. Mounting pitch differs depending on whether 1 or 2 speakers are mounted.

![Wall mounting dimensions]

**WARNING**

Bolts and nuts used to fix a bracket base on a wall are not included. Use bolts and nuts that are appropriate for the construction of wall.

**Step 2.** Remove the screws on both sides of the speaker. When jointing 2 speakers, use the optional SR-EP4 Extension Plate. For speaker joint, refer to the instruction manual enclosed with the SR-S4L Line Array speaker.

**Note**

Up to 2 speakers can be joined and mounted. Never join more than 2 speakers.

**Step 3.** Attach the speaker mounting bracket (A) and (B) to the speaker. When facing the speaker toward the right, attach Bracket (A) to the upper part of the speaker and Bracket (B) to the lower part. Conversely, when facing the speaker toward the left, attach Bracket (B) to the upper part and Bracket (A) to the lower part.

**Step 4.** Fix the hexagon head bolts (1 each on both sides of upper and lower brackets) loosely to the speaker mounting bracket.

**Step 5.** Connect a speaker cable to the speaker.

**Step 6.** Insert the loosely fitted bolts into the bracket base’s screw slots.

**Step 7.** Tighten the hexagon head bolts (1 each on both sides of upper and lower brackets) to securely fix the speaker brackets. At the same time tighten 4 loosely fixed bolts in step 4.

3. ADJUSTING THE SPEAKER ORIENTATION

Loosen the angle adjustment bolts of the speaker brackets to determine the speaker orientation. The speaker brackets are marked in 5° for angle reference purposes.

When facing the speaker toward the right

**Note**

Tighten the loosely fixed bolts after finishing angle adjustment.

4. SPECIFICATIONS

<table>
<thead>
<tr>
<th>Specification</th>
